

Collecting an Exhaust Sample

Before beginning:

- Be sure you are properly trained to perform the operation.
- Always don the appropriate Personal Protective Equipment (PPE)

Hearing Protection

Eye Protection

Nasal Protection

Hand Protection

Body Protection

Safety is Important

A photograph showing a worker in safety gear (goggles, gloves, apron) kneeling and working on the undercarriage of a vehicle. A second person, identified as a safety man, stands nearby holding a clipboard. A red circle highlights the safety man's head. A blue text box is overlaid on the bottom left.

**Make sure you
have a safety
man. Two-Person
Policy applies!**

Keep that jar close to the pipe!

Cap the jar immediately to prevent contamination!

**Annotate
Unit #,
Date, Time,
& Sample
Collection
Technician
Name on
the lid, and
route to
Fuels
Laboratory
for analysis.**

**Congratulations. Another OJT
task complete!**
